

Climate change, energy and water challenges: What can we do?

Presented by: Dr. Gene Whitney, Manager of the Energy Section for the Congressional Research Service at the Library of Congress

September 11, 2008

1:00 PM

125 Butler Carlton Civil Engineering Building

Please join us for a special presentation by Dr. Gene Whitney, Manager of the Energy Section for the Congressional Research Service at the Library of Congress, on Global Warming, its impact on energy and water resources, and how the campus community can play a role in addressing these issues. Dr. Whitney was formerly the Assistant Director for Environment at the White House Office of Science and Technology Policy.

All Missouri S&T students, faculty and staff are welcome to attend.

Hosted by:
